

## WATER TRANSPORTATION

Tennessee is centrally located on the nation's inland waterway system and enjoys the benefits of more than 1,062 miles of navigable waterways. The Mississippi, Tennessee and Cumberland Rivers and their tributaries supply economical energy-efficient transportation to almost every community in the state.

Memphis ranks second among U.S. inland ports, attesting to the importance of water transportation for West Tennessee. The Tennessee-Tombigbee Waterway provides Tennessee with direct access to the Gulf of Mexico harbors and international markets. The largest civil works project ever undertaken by the U.S. Army Corps of Engineers, the Tenn-Tom offers new and exciting opportunities for waterway transportation in Tennessee.

More than 200 existing Tennessee industries utilize the waterways with their own special-purpose terminals. A number of well-equipped general purpose terminals are also available. Most general purpose terminals have a variety of equipment for handling cargo of all types and can accommodate the interchange of traffic between barge and rail.

### THE TENNESSEE TOMBIGBEE WATERWAY

## GENERAL PURPOSE RIVER TERMINALS IN TENNESSEE

<b>River</b>	<b>County</b>	<b>Facility Name</b>
